## Why Germa Cabinets?

We assure to provide 100% precise product. Right from the starting point of the make of cabinet till the end, we make sure products qualify the complete process and pass the quality test before dispatch. We provide cabinet sets in two variants – **HDHMR**

**Various Advantages & Additional Features are Mentioned Below :**

### High Density High Moisture Resistance Board

Advantages: • Water Proof • Termite Proof • Borer Proof • High Density • Split Resistant - Screwing • No bends calibrated Panel • Polish ready surface • Cost Effective • Environment friendly • Long life	Additional Product advantages	Mirror - Saint Goabin / Modi Guard Thickness - 4mm Bordered with same style of cabinet colour
	Hardware	304 S.S. Hinges, Hettich - Telescopic Channels
	Paint Standards	Complete Body - Inside & Outside is Painted
	Warranty	CABINET - 3 years* Ceramic Basin - 5 years* for

\* Terms and Conditions Apply

Note : Hinges & Mirrors are not covered under any warranty

### MAINTENANCE TIPS

**KEEP THE SURROUNDING WELL VENTILATED, USE THE EXHAUST FAN REGULARLY IF THE CABINET IS SET INSIDE THE BATHROOM**

The surrounding of the bathroom has to be kept well ventilated because the moisture left after hot water bath and the moisture in the air can damage the soft closing hinges and the silvering borders of the mirror very easily.

**AVOID KEEPING ABRASIVE CLEANERS WITH ACID CONTENT INSIDE THE CABINET**

If acid products are kept inside the cabinet, the fumes from the chemical abrasives can easily damage the hinges and can damage the body of the cabinet by leaving stains on the cabinet. Avoid keeping products like Harpic and Abrasive products inside the cabinet

**REGULAR CLEANING OF CERAMIC BASIN IS REQUIRED WITH SOAPY WATER AND SOFT SPONGE**

Do not use any kind of sharp objective products like Scrubbers to clean the Ceramic Basin. If the basin is not cleaned on regular basis, the left-over residue can damage the coating and can leave permanent stains.

**CLEAN THE CABINET WITH SEMI WET SOFT CLOTH**

Do not spill water on the whole cabinet while cleaning, if spilled and cleaned by splashing water on cabinet it will result in the loosening of edge banding of the borders of the cabinet.

**CLEAN THE MIRRORS ON REGULAR BASIS-SPRINKLE SOME WATER AND WIPE IT WITH SOFT COTTON CLOTH OR WIPE WITH NEWSPAPER**

Mirrors have to be cleaned on regular basis, because areas near sea shores have salt in the air, moisture and also salt contend in water. Mirrors if left uncleaned, the moisture will leave spots on the Mirrors, and these spots can convert into rust spots. Do not clean the mirrors with powdered or liquid abrasives.

**REGULARLY CHECK THE HINGES AND ITS CONDITION FOR SMOOTHER RUN, ADD TWO DROPS OF OIL EVERY MONTH, THIS WILL RESULT IN VERY LONG LIFE OF THE HINGES (HARDWARE)**

Hinges inside the cabinet has to be maintained for long life of cabinet. When hinges are left unchecked for a long time, due to improper ventilation or any other reason, they tend to get rusted. Do not force open if the doors get locked, if it's done, the cabinet doors and body can get damaged. In such case basins have to be removed from the top side and changes of hinges have to be done.
